NOISE BARRIER VISUALIZATIONS

IDOT recognizes that noise barriers would be a new built element in the Project Corridor, and considers them a potential opportunity to provide visual enhancement to both the mainline and adjacent land uses. As such, IDOT is open to the innovative use of both traditional and new materials for noise barrier construction and will work with local communities to select the most appropriate material(s), character, and finishes for barriers with the local context. To achieve the ultimate desired character and aesthetic requested by the stakeholders, local financial participation may be required.

The following illustrations are representative of the possible appearance of the proposed noise walls at various locations within the Project Corridor. The ultimate appearance of noise barriers will be determined during the final design phase of the project.
